

### 01. Identification

Product name: NK 13-0-44+1%Mg  
 Technical name: potassium and Magnesium  
 Proper shipping Name: Oxidizing Solid ,N.O.S.  
 Common name/synonym: Kalisalpeter  
 Company: Kemapco  
 P.O.Box 2564 Aqaba  
 Zip code 77110 Jordan  
 Medical help and advice: Clinic of Occupational  
 Medicine

### 02. Composition

The product is a crystalline product of potassium nitrate with 0,1 % coating agent.

Formula:  $KNO_3 + MgSO_4$   
 CAS No. of  $KNO_3$  is: 7757-79-1  
 CAS No. of  $MgSO_4$  is: 7487-88-9

### 03. Hazard identification

The product is hazardous only to a certain extent. It may cause irritation to eyes and mucous membrane. When in contact with combustible materials it has an oxidizing effect which increases the fire risk.

### 04. First-aid measures

**Skin:** Wash thoroughly with soap and water. Contaminated clothes should be rinsed before using again in order to reduce the fire risk.

**Eyes:** Rinse immediately with plenty of water for at least 15 min, eyes wide open. Seek medical help.

**Inhalation:** Rinse nose, mouth and throat with water

**Ingestion:** Immediately rinse mouth and throat. Drink plenty of water or milk. Do not induce vomiting. Seek medical help.

If inhalation of decomposition gases in a fire immediately seek medical help. Inform of the risk of inhalation of nitrate gases.

### 05. Fire-fighting measures

Potassium nitrate is not combustible. However, it decomposes when heated and liberate toxic nitrate gases. Potassium nitrate is fire feeding. Extinguish the fire with water. Stay in the windward side and use breathing mask for protection against nitrate gases.

### 06. Accidental release measures

Avoid generation of dust when handling of spillage. Use personal protection equipment (see point 8). Sweep up spillage. Can normally be used again as fertilizer.

### 07. Handling and storage

Avoid any handling causing dust formation. Access to water in case of fire and eyewash facility should be available. Store the product in a dry place and without contact with combustible materials. Storing must be in accordance with the regulations of the Department of the Environment .

### 08. Exposure control/personal protection

If formation of dust cannot be avoided or if ventilation is not adequately use of dust respirator (P2) is necessary. Wear gloves and dust glasses. During work with potassium nitrate eating, drinking, and smoking are not allowed. No threshold limit value has been established for the product.

### 09. Physical and chemical properties

Appearance: Crystalline powder  
 Color: White  
 Smell: None  
 Bulk density: 1.1 -1.2 kg/l  
 Solubility: Fully soluble in water  
 PH: 6-9 in 10% water solution

### 10. Stability and reactivity

Under normal circumstances the product is stable. It is fire feeding (a oxidizing substance) to organic materials. At a temperature over 400° C the product decomposes and develop nitrate gases.

### 11. Toxicological information

Acute toxicity:  
 LD<sub>50</sub> (orally, rats) : 3750 mg/kg. The product is not classified as hazardous. It may cause irritation to mucous membrane and by ingestion of larger quantities it may cause acute stomach disorders. No long-term adverse effects are known.

### 12. Ecological information

Potassium nitrate may cause damages to the environment like undesirable manurial value. In case of accidental water course contamination inform the appropriate water or environmental authority.

### 13. Disposal

Accumulated spillage can normally be used again as fertilizer material. Dispose of polluted spillage to an authorized waste facility as chemical waste.

### 14. Transport information

IMDG : class 5.1,  
Packing group: III  
ADR/RID : class 5.1.  
UN-No. : 1479  
IBC : IBC 08  
EmS-No. : F-A , S-Q

### 15. Regulatory information

Globally Harmonized System of classification & labeling of chemicals (GHS)

REGULATION (EC) NO 1272/2008 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL OF 16 December 2008 on classification, labeling and packaging of substances and mixtures

Hazard class and Category Code

-Physical Hazard: Oxidizing solids- Category 3-  
Warning (CLP: Ox. Sol. 3)

### 16. Other information

The information stated in point 1-15 is issued from our knowledge of the product. It does not contain any guarantee for special properties. It is important that the person(s) using the above product is/are informed of the exact laws and regulations and that the product is used according to these and for no other purposes than supplied for.
